

TECHNICAL CHARACTERISTICS

- > Any PROCITY® railing can become removable with Lockblock® socket system kits
- > Two sockets including one that locks with a triangle key
- > A fixed central flush boss ensures there is no trip hazard to pedestrians when the railing is removed
- > "Concrete effect": The railing remains perfectly stable once placed into the sockets
- > Self-draining through gravel at bottom of sockets
- > Reservoir allows for the accumulation of sand and dirt
- > Locks and unlocks with 11 mm key and screw bolt
- > The lock is protected by a black lacquered flap
- > Finish: galvanised steel for complete corrosion protection
- > The barriers sit 180 mm in the sockets to ensure a constant height with other products
- > For safety, the exposed slots for our removable railing kits are smaller than 2 cm

DRAWING

INSTALLATION

- > Installation: concreted directly into ground
