

Large plastic **HERITAGE** planter

TECHNICAL CHARACTERISTICS

- > 2 dimensions:
 - Ø 800 x height 800 mm
 - Ø 1000 x height 1000 mm
- > Material: high-density polyethylene plastic, 5 mm thick, lightweight and UV-resistant
- > Drainage system: drilled grid placed at the bottom of the planter forms a water reservoir (the bottom of the planter also has 2 holes to evacuate the overflow)

INSTALLATION

- > To be placed on the ground

OPTION

- > Anti-tip anchor kit (4 legs + screw)

PRODUCT CODES

	Ø 800 mm	Ø 1000 mm
Volume	0,177 m³	0,371 m³
Product codes	201651	201652
Option		
Anchoring kit	201669	

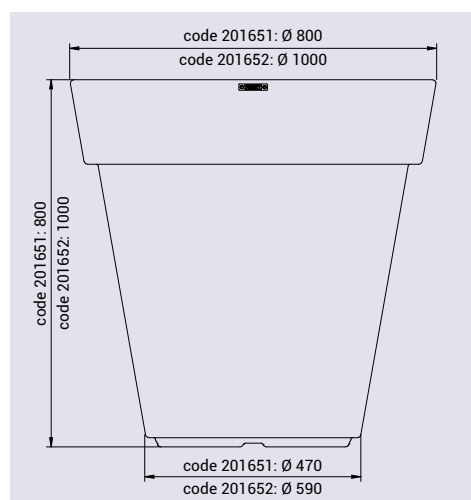

Code 201652

Code 201651

Code 201652 + 201669

DRAWING

HIGH-DENSITY POLYETHYLENE

Rotationally moulded HDPE

For the manufacture of our planters, we use high-density polyethylene, also known as HDPE.

This 100% recyclable material makes it possible to create light and resistant products, it can withstand temperature variations, shocks, corrosion and abrasion. Their forms are created by rotational moulding.

Our HDPE products are maintenance-free.

FINISH PAINTED

- > Available in our range of plastic colours
